# Mathematics teaching

## Innovate

Teaching today is challenging, exciting and rewarding with inventive, creative and technology-based teaching practices.

## Motivate

Enthuse and inspire young people – teach today and create tomorrow. Teaching is more than just a job.

## Educate

Help young people learn and develop the skills for an ever-changing world. Teaching empowers others to take the next step in their lives.

## Teaching mathematics today

Teaching today enables you to share your love of maths.

Teaching mathematics at primary or secondary level is a stimulating and rewarding career. As a maths teacher you can help set up young people to deal with the challenges and situations they will encounter in their day-to-day life.

Ensuring the ongoing supply of high quality teachers – of particular curriculum subjects, such as maths, and in certain geographic areas – is a priority.

Mathematics skills are vital to help Victoria achieve its economic, cultural and environmental goals.

To become a qualified maths teacher you need to complete university studies that include at least a two year sub-major sequence of study in mathematics and an additional approved teaching qualification.

Take the first step towards teaching in a Victorian government school today and visit [www.teaching.vic.gov.au](http://www.teaching.vic.gov.au)
