

Can you find these shapes in the pattern above? Colour in one of each in the pattern.

Use an X to mark the corners of the U shape which are square corners. One has already been done for you. There might be more than you think.

You can make the pattern look good by using four colours to colour it in. Use four different colours to colour in the four U shapes near each other, and then use the same arrangement for other groups of 4. Make sure you do not have the same colours touching each other.
