VIAF: To mark progress towards reducing Indigenous disadvantage, Strategic Change Indicators have been selected. For each indicator, the government has committed to aspirational targets that will drive improvements in outcomes and help track the progress of the VIAF. The timeline for achievement of the targets has been set at 2013, 2018 and 2023. The targets are deliberately ambitious, demonstrating a commitment to real and lasting change. They are presented in Appendix 1. The targets developed are consistent with, or exceed, the targets agreed at the Council of Australian Governments.
