The individual learner

At this level, students describe the factors that affect learning and identify strategies that will enhance their own learning. With support, they identify their learning strengths and weaknesses and learning habits that improve learning outcomes. They seek teacher feedback to develop their content knowledge and understanding. They make and justify some decisions about their learning and, with support, set learning improvement goals. They contribute to the development of protocols that create a positive learning environment in the classroom.

Managing personal learning

At this level, students set short-term, achievable goals in relation to specific tasks. They complete short tasks by planning and allocating appropriate time and resources. They undertake some multi-step, extended tasks independently. They comment on task progress and achievements. They manage their feelings in pursuit of goals and demonstrate a positive attitude towards their learning.

The individual learner

At this level, students identify, with support, their preferred learning styles and use strategies that promote learning. They monitor and describe progress in their learning and demonstrate learning habits that address their individual needs. They seek and respond to teacher feedback to develop their content knowledge and understanding. They identify and explain how different perspectives and attitudes can affect learning. They negotiate learning improvement goals and justify the choices they make about their own learning. Students actively develop, monitor and refine protocols that create a positive learning environment in the classroom.

Managing personal learning

At this level, students develop and implement plans to complete short-term and long-term tasks within timeframes set by the teacher, utilising appropriate resources. They undertake some set tasks independently, identifying stages for completion. They describe task progress and achievements, suggesting how outcomes may have been improved. They persist when experiencing difficulty with learning tasks. They seek and use learning support when needed from peers, teachers and other adults. They practise positive self-talk. They demonstrate a positive attitude to learning within and outside the classroom.
The individual learner
At this level, students monitor and describe their progress as learners, identifying their strengths and weaknesses and taking actions to address their weaknesses. They identify a variety of learning habits and adopt those which assist their learning. They identify, select and use an expanded repertoire of learning strategies appropriate to particular tasks. They seek and respond to feedback from peers, teachers and other adults and explain how their ideas have changed to develop and refine their content knowledge and understanding. Students demonstrate an awareness of different cultural and societal beliefs, values and practices, identifying and discussing the effect of ethical issues on learning and working with others. With support, students determine learning improvement goals, justifying their decisions and making appropriate modifications as necessary. They consider both their own and others’ needs when making decisions about suitable learning processes and the creation of positive learning environments within and outside the classroom.

Managing personal learning
At this level, students set realistic short-term and long-term learning goals within a variety of tasks and describe their progress towards achieving these. They complete competing short, extended and group tasks within set timeframes, prioritising their available time, utilising appropriate resources and demonstrating motivation. They initiate and undertake some tasks independently, within negotiated timeframes. They review the effectiveness of the management of tasks, identifying successes and suggesting strategies that would improve outcomes. They develop and use criteria to evaluate their work, and use these criteria to make appropriate refinements. They demonstrate a positive and structured approach to learning, identifying and using effective strategies that assist with study, both at school and at home.
The individual learner
At this level, students work independently to implement a range of strategies, as appropriate, to maximise their learning. They monitor and reflect on and discuss their progress as autonomous learners, identifying areas for improvement in their learning and implementing actions to address them. Students seek and respond to feedback from peers, teachers and other adults to develop and refine their content knowledge and understanding, identifying areas for further investigation. They evaluate the effectiveness of their learning strategies, study techniques and learning habits, and make appropriate modifications. They identify their interests, strengths and weaknesses and use these to determine future learning needs, especially in relation to the post-compulsory pathways. Students identify the ethical frameworks that underpin their own and others’ beliefs and values and describe how the conflicts and dilemmas they identify may affect learning. They determine, monitor and modify learning improvement goals, taking into account current and future learning needs. They determine the factors that contribute to the creation of positive learning environments and establish, follow and monitor protocols for a variety of learning situations.

Managing personal learning
At this level, students initiate personal short-term and long-term learning goals and negotiate appropriate courses of action to achieve them. Students allocate appropriate time and identify and utilise appropriate resources to manage competing priorities and complete tasks, including learner-directed projects, within set timeframes. They initiate and negotiate a range of independent activities with their teachers, providing progress and summative reports for teachers and stakeholders. They monitor and evaluate the effectiveness of their task and resource management skills, reflecting on their progress and suggesting and implementing appropriate management strategies for improvement. They take responsibility for their learning environments, both at school and at home, anticipating the consequences of their actions. They demonstrate control of impulses and mood modulation. Students review and modify the criteria they use to check that their work is relevant, accurate and meets task objectives and make appropriate changes to completed tasks using these criteria. They identify and refine the strategies they use to study, organise and revise their work, both at school and at home.

In this Domain, Standards for assessing and reporting on student achievement are introduced at Level 3. The learning focus statements for Levels 1 and 2 provide advice about learning experiences that will assist students to work towards the achievement of the standards at Level 3.
